

Hello,

My portfolio is just a sample of the kind of work that I can do. I tried to make a simple and enjoyable user experience with concise information to get the gist of what I can do. And while most of my portfolio does NOT talk about what I can and cannot do, I purposefully included objects and functionality in it in order to demonstrate a few skills of which I am capable. So, have a gander at my resume and portfolio, and, if you're interested, check out my code under the hood.

I learn quickly and take lots of pride in my work. As such, if I don't know how to do something, I can figure it out fairly quickly and am highly invested in ensuring that that which I am figuring out works the way that I intend it to. I rarely ask for help, as there is an ever-expanding amount of information on the web, where a simple search can result in an answer; however, I also know when it would be more efficacious to ask a live person for help. Basically, I know my own limitations, and I know how to expand the boundaries of my limitations.

I am currently living in El Paso, TX, but my family and I are ready to move as soon as I can procure employment. I suppose my compensation requests would be ~\$30,000/year.

Hope to hear from you soon!

Adam Moore
